Models

Check the identification plate (ID) on your lower for the 6-digit part number of your lower. Use the following matrix to define the construction of your lower, based on the six digits. For example, Lower Part Number **L180C1** represents the lower (L), output volume (180), carbon steel construction (C), and no filter with Xtreme Seal™ packing stack (1).

To order replacement parts, see **Parts**, starting on page 16.

NOTE: For maximum fluid working pressures, see **Technical Data** section starting on page 34.

Warnings

The following warnings are for the setup, use, grounding, maintenance, and repair of this equipment. The exclamation point symbol alerts you to a general warning and the hazard symbol refers to procedure-specific risk. Refer back to these warnings. Additional, product-specific warnings may be found throughout the body of this manual where applicable.

 WARNING	
	<p>FIRE AND EXPLOSION HAZARD</p> <p>Flammable fumes, such as solvent and paint fumes, in work area can ignite or explode. To help prevent fire and explosion:</p> <ul style="list-style-type: none"> • Use equipment only in well ventilated area. • Eliminate all ignition sources; such as pilot lights, cigarettes, portable electric lamps, and plastic drop cloths (potential static arc). • Keep work area free of debris, including solvent, rags and gasoline. • Do not plug or unplug power cords, or turn power or light switches on or off when flammable fumes are present. • Ground all equipment in the work area. See Grounding instructions. • Use only grounded hoses. • Hold gun firmly to side of grounded pail when triggering into pail. • If there is static sparking or you feel a shock, stop operation immediately. Do not use equipment until you identify and correct the problem. • Keep a working fire extinguisher in the work area.
	<p>SKIN INJECTION HAZARD</p> <p>High-pressure fluid from gun, hose leaks, or ruptured components will pierce skin. This may look like just a cut, but it is a serious injury that can result in amputation. Get immediate surgical treatment.</p> <ul style="list-style-type: none"> • Do not point gun at anyone or at any part of the body. • Do not put your hand over the spray tip. • Do not stop or deflect leaks with your hand, body, glove, or rag. • Do not spray without tip guard and trigger guard installed. • Engage trigger lock when not spraying. • Follow Pressure Relief Procedure in manual 311164, when you stop spraying and before cleaning, checking, or servicing equipment.
	<p>EQUIPMENT MISUSE HAZARD</p> <p>Misuse can cause death or serious injury.</p> <ul style="list-style-type: none"> • Do not operate the unit when fatigued or under the influence of drugs or alcohol. • Do not exceed the maximum working pressure or temperature rating of the lowest rated system component. See Technical Data in all equipment manuals. • Use fluids and solvents that are compatible with equipment wetted parts. See Technical Data in all equipment manuals. Read fluid and solvent manufacturer's warnings. For complete information about your material, request MSDS forms from distributor or retailer. • Check equipment daily. Repair or replace worn or damaged parts immediately with genuine manufacturer's replacement parts only. • Do not alter or modify equipment. • Use equipment only for its intended purpose. Call your distributor for information. • Route hoses and cables away from traffic areas, sharp edges, moving parts, and hot surfaces. • Do not kink or over bend hoses or use hoses to pull equipment. • Keep children and animals away from work area. • Comply with all applicable safety regulations.

 WARNING	
 	<p>MOVING PARTS HAZARD</p> <p>Moving parts can pinch or amputate fingers and other body parts.</p> <ul style="list-style-type: none"> • Keep clear of moving parts. • Do not operate equipment with protective guards or covers removed. • Pressurized equipment can start without warning. Before checking, moving, or servicing equipment, follow the Pressure Relief Procedure in manual 311164. Disconnect power or air supply.
	<p>TOXIC FLUID OR FUMES HAZARD</p> <p>Toxic fluids or fumes can cause serious injury or death if splashed in the eyes or on skin, inhaled, or swallowed.</p> <ul style="list-style-type: none"> • Read MSDS's to know the specific hazards of the fluids you are using. • Store hazardous fluid in approved containers, and dispose of it according to applicable guidelines. • Always wear impervious gloves when spraying or cleaning equipment.
	<p>PERSONAL PROTECTIVE EQUIPMENT</p> <p>You must wear appropriate protective equipment when operating, servicing, or when in the operating area of the equipment to help protect you from serious injury, including eye injury, inhalation of toxic fumes, burns, and hearing loss. This equipment includes but is not limited to:</p> <ul style="list-style-type: none"> • Protective eyewear • Clothing and respirator as recommended by the fluid and solvent manufacturer • Gloves • Hearing protection

Component Identification

(Shown with Built-in Filter)

XP Sprayer Xtreme Lowers and e-Xtreme Sprayer Lowers

◆ e-Xtreme Sprayer Lowers use opposite locations for the pipe plug and rupture disc. The pipe plug is installed at location (N), and the rupture disc is installed at location (L).

Key:

- A Displacement Rod
- B Packing Nut
- C Throat Cartridge
- D Outlet Housing
- E Locking Pin
- F Cylinder
- G Drain/Purge Valve (not on XP Lowers)

- H Inlet Housing
- J Fluid Outlet
- K Optional Fluid Outlet (for second spray gun; not on XP Lowers)
- L Pipe Plug (non-filtered outlet)
- M Fluid Filter
- N Over Pressure Rupture Disc (for 36cc–145cc only)

Repair

Required Tools

- Set of adjustable wrenches
- Torque wrench
- Rubber mallet
- Arbor press
- Soft wooden block (approx. 1 square ft in size)
- Large vise with soft jaws
- Thread lubricant
- Petroleum jelly
- Anti-seize lubricant

Disassembly

Layout all removed parts in sequence to ease reassembly. Clean all parts with a compatible solvent and inspect them for wear or damage.

NOTE: Repair kits are available to replace the throat (3) and piston (4) packings, and to replace the o-rings and cylinder seals. For best results, use all new parts in the kit. Kit parts are marked with an asterisk, for example (25*). These kits can also be used to convert the lower to different packing materials. See the Packing Kits sections.

1. Relieve pressure. See your Xtreme Packages manual (311164) for instructions.
2. Disconnect lower from motor as illustrated in your Xtreme Packages manual (311164). Or, if you have a cart mounted system, tip cart up to service lower on cart.

3. For lowers with built-in filters, loosen and remove both top filter cap (20) and bottom filter cap (26). See **Service Built-in Filter**, page 14.

4. Loosen and remove inlet housing (14) from lower cylinder (11).

5. Press inlet ball (16) out from bottom of inlet housing (14) (take care not to damage seat (18) to remove entire inlet ball guide assembly).

NOTE: On model L180C7 only, shims (17) will be below inlet ball guide (15).

- a. *For Xtreme Lowers:* Remove inlet ball, bottom o-ring (27*), and seat. Then remove remaining o-rings from top and bottom grooves of inlet ball guide (15).

FIG. 1:

- b. For 115 and smaller XP Lowers: Remove spring, inlet ball, bottom o-ring, and shims. Then remove remaining o-rings from top and bottom grooves of inlet ball guide (15).

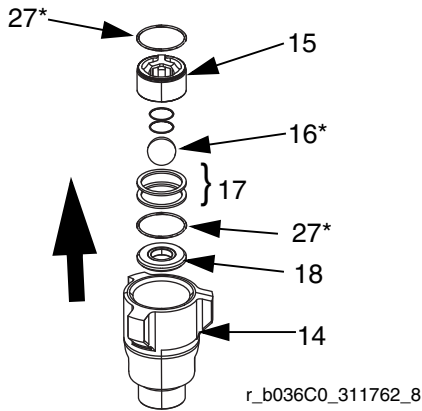

FIG. 2

- c. For 145cc and larger XP Lowers: Remove inlet ball, bottom o-ring, and shim. Then remove remaining o-rings from top and bottom grooves of inlet ball guide (15).

FIG. 3

6. Stand lower upright in large vise. Using a rubber mallet, loosen, but do not remove packing nut (2).

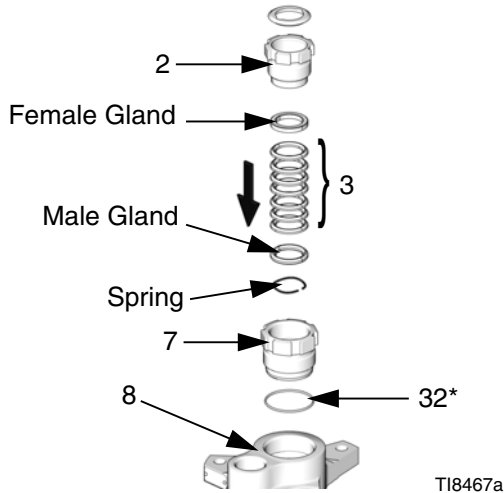

7. Remove locking pin (10) from lower cylinder (11).

8. Unscrew and lift outlet housing (8) straight up off cylinder. Be careful not to scratch displacement rod (1).

9. Remove cartridge assembly. Remove o-ring (27* or 29*) from bottom of outlet housing (8), and then unscrew packing nut (2) from packing cartridge (7). Remove female gland, male gland, v-packings (3), and spring from packing cartridge (7).

12. Put flats of piston valve (13) in a vise. Use a wrench to loosen displacement rod (1) from piston valve.

13. Remove displacement rod from piston valve. Be careful that piston ball (12*) does not fall as you separate piston valve and rod.

NOTICE

To reduce the possibility of costly damage to displacement rod (1) and lower cylinder (11), first place lower cylinder on a soft block of wood. Always use a rubber mallet or an arbor press to drive the displacement rod out of the lower cylinder. Never use a hammer to drive the rod out. Damage to the rod end will shorten pump life.

10. Stand lower cylinder (11) upright on a wooden block. Using a rubber mallet or an arbor press, drive displacement rod (1) out of the bottom until the piston comes free. Pull the rod and piston from the cylinder, being careful not to scratch the rod or cylinder.

14. Remove glands and v-packings (4) from piston valve (13). Inspect piston ball (12*) and piston valve for wear or damage.

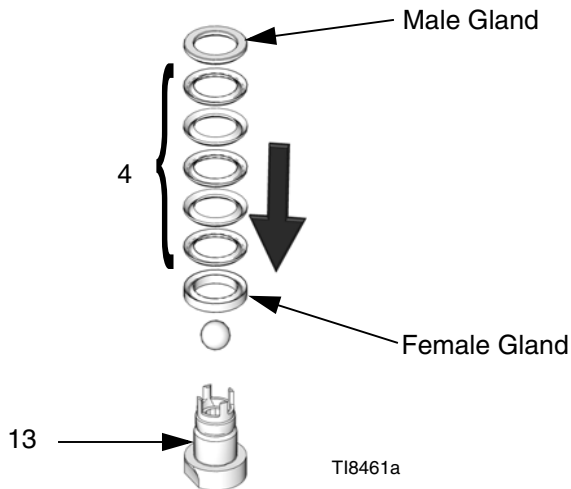

11. Inspect outer surface of displacement rod (1) and inner surface of lower cylinder (11) for scoring or wear; replace if damaged.

15. Clean all parts with a compatible solvent.

Reassembly

1. Replace female gland on piston valve (13). Install the five v-packings (4) one at a time with lips facing up. Refer to the Packing Kits sections for the correct packing order for your lower. Install the male gland.

NOTE: To convert the lower to a different packing material, see the Packing Kits sections. For best results, soak leather packings in oil before reassembly.

2. Ensure there are no burrs or debris on mating threads of displacement rod (1) and piston valve (13). Apply anti-seize lubricant to threads and mating surfaces of displacement rod and piston valve.

3. Place flats of piston valve in a vise. Place piston ball (12*) on piston valve.

4. Screw displacement rod (1) onto piston valve (13), and hand tight. Then torque per table on page 13.

NOTE: Position crowfoot of torque wrench at a 90° angle to ensure accurate torque values.

NOTICE

To reduce the possibility of costly damage to displacement rod (1) and lower cylinder (11), first place lower cylinder on a soft block of wood. Always use a rubber mallet or an arbor press to drive the displacement rod into the lower cylinder. Never use a hammer to drive the rod.

- To reinstall displacement rod (1) into lower cylinder (11), first lubricate piston packings (4). Then, with piston end facing down, lower rod into cylinder. Start piston into cylinder as much as possible, then drive rod and piston the rest of the way into the cylinder with an arbor press or rubber mallet.

- Lubricate inside of packing cartridge (7), outside threads of packing nut (2), and throat packings (3). Install packing cartridge into housing. Place male gland and spring in packing cartridge. Install the seven v-packings one at a time with lips facing down. Refer to the Packing Kits sections for the correct packing order for your lower. Install female gland. Then, reassemble packing nut (2), but do not tighten.

NOTE: To convert lower to a different packing material, see Packing Kits sections. For best results, soak leather packings in oil before reassembly.

*Blue o-ring for 220cc, 250cc, 290cc lowers.

- Screw lower cylinder (11) onto outlet housing (8) until it bottoms out. Use a wrench to tighten lower

cylinder. Back off as little as possible until hole in housing lines up with flat on cylinder. Insert locking pin (10) into cylinder.

- Assemble inlet housing.

- For 115cc and smaller XP Lower: Install seat (18), two shims (17), inlet ball (16), spring (43), and one o-ring (27) into inlet housing (14).

- For 145cc and larger XP Lower: Install seat (18), shim (17), inlet ball (16), spring (43), and one o-ring (27) into inlet housing (14).

- c. For Xtreme Lowers: Install inlet seat (18), inlet ball (16), and one o-ring (27*) into inlet housing (14).

12. Thread inlet housing (14) onto lower cylinder (11). Torque to 140-150 ft-lb (189-203 N•m).

9. Lubricate and install o-rings (27*) in top and bottom grooves of inlet ball guide (15).
10. On model L180C7, L145CP and L145CR only, install shims (17) into inlet housing (14), then press inlet ball guide (15) into inlet housing (14).

11. On all models except L180C7, press inlet ball guide (15) into inlet housing (14) and install shims (17).

- ◆ Factory set configuration for optimum pump change over.
- ❖ Shims can be configured to change ball travel length. Use longer ball travel length for higher viscosity fluids.
- ⊗ Optional inlet ball spring kit available. Use to improve change over rate with longer ball travel configurations. See **Kits**, page 30, for more information.

FIG. 4: Shim Configuration for lowers without inlet spring

NOTE: Shims (three maximum) can be assembled either for short ball travel or long ball travel. See FIG. 4 for an example of each.

13. Using torque wrench, torque packing cartridge (7) to outlet housing (8). Torque to 140-150 ft-lb (189-203 N•m).
14. Insert packings in correct orientation; see **Parts**, page 16. Install packing nut (2) and torque to the value in the table below.

Required Torque

Pump	Throat Packing (2)	Piston Valve (13)
L036C0 L048C0 L054C0 L058C0	70-80 ft-lb (95-108 N•m)	85 ft-lb (114 N•m)

L290C3 L290C4	125 ft-lb (168 N•m)	

15. For lowers with built-in filter, see **Service Built-in Filter**, page 14, if filter needs service. Then reinstall both top filter cap (20) and bottom filter cap (26).

16. Reconnect lower to air motor. See Xtreme Packages manual (311164).

Service Built-in Filter

Select models have a built-in filter in the lower housing.

Disassembly

To remove and clean the built-in filter:

1. Relieve fluid pressure.
 - a. Turn off sprayer motor and any feed pumps.
 - b. Drain all fluid pressure from sprayer. See sprayer manual for detailed instructions.

2. Use wrench to loosen and remove top filter cap (20).

3. Remove o-ring (59*), strainer (23), and filter support (24).

4. Use wrench to loosen and remove bottom filter cap (26). Remove o-rings (22*, 25*).

5. Replace o-rings (22*, 25*), strainer (23), and filter support (24).

NOTE: O-rings take a set at high pressures. Always replace the o-rings once the filter caps have been removed.

6. Remove pipe plug (49), and use brush or drill to clean port as necessary.

Reassembly

NOTICE

To prevent leaking, ensure that the proper repair components are used for the appropriate series pump. See **Filter Cap Repair Kit, 24F975**, page 31, for more information.

To reassemble the built-in filter:

NOTE: Lubricate all o-rings before installation.

1. Install o-rings (22*, 25*) onto bottom filter cap (26). Then use wrench to reassemble and tighten bottom filter cap. Torque to 40-60 ft-lb (52-82 N•m).

2. Reassemble o-ring (59*) onto top filter cap (20). Install strainer (23), and filter support (24) in top filter cap. Then use wrench to install and tighten top filter cap. Torque to 40-60 ft-lb (52-82 N•m).

NOTE: 36cc through 115cc Xtreme pump lowers no longer use the short filter screens (23) or supports (24). See page 31 for details.

Parts

XP Sprayer Lower Models

36cc, 48cc, 54cc, 58cc, 72cc, 85cc, 90cc, 97cc, and 115cc

* Parts included in repair kits.
See Repair Kits sections.

†Thick, medium, and thin refers to the relative cross-section thickness of the o-ring seals.

▲ Replacement Danger and Warning labels, tags, and cards are available at no cost.

* Parts included in repair kits.

† See page 31 to verify correct part numbers.

Part numbers listed are for bulk quantities. Individual quantities are included in repair kits. See **Repair Kits** on page 27.

XP Sprayer Lower Models 145cc, 180cc, 220cc, 250cc, and 290cc

* Blue o-ring for 220, 250, and 290 lowers.

✱ 180cc–290cc use plug. Ensure orifice of (55) points down

†Thick, medium, and thin refers to the relative cross-section thickness of the o-ring seals.

* Parts included in repair kits. See Repair Kits sections.

- 1 Torque per specifications in table, page 13.
- 2 Torque to 140-150 ft-lb (189-203 N•m).
- 4 Torque to 40-60 ft-lb (52-82 N•m).
- 5 Apply lubricant to threads before assembly.
- 6 Torque to 45-55 ft-lb (61-75 N•m).

Xtreme and e-Xtreme Sprayer Lower Models 85cc 115cc, 145cc, 180cc, 220cc, 250cc, and 290cc

Torque per table on page 13.

Torque to 140-150 ft-lb (189-203 N•m).

Torque to 40-60 ft-lb (52-82 N•m).

Apply lubricant to threads before assembly.

7. Thick, medium, and thin refers to the relative cross-section thickness of the o-ring seals.

On models L180C7, L145CP, and L145CR only, all 3 shims (17) are installed together between inlet seat (18) and inlet ball guide (15).

* Blue o-ring for 220, 250, and 290 lowers.

* Parts included in repair kits.
See Repair Kits sections.

Repair Kits

Repair Kits - Graco Formulated UHMWPE/Leather

Repair kits contain a set of four UHMWPE and three leather packings for the throat, and a set of three UHMWPE and two leather packings for the piston that are ideal for abrasive applications. Xtreme Seal packing sets are standard in Xtreme NXT Spray Packages and are used with models L___ C1, L___ C2, L___ M, L1 ___ CL, L1 ___ CN, L___ C8, and some 5.9 in. bolt pattern models. Kits also include items 9, 12, 16, 19, 22, 25, 27, 32, and 59. See parts list for your lower model.

Lubricate packings; soak leather packings in oil for one hour before assembly.

FIG. 5: Repair Kits

Repair Kits - PTFE

Repair kits contain a set of seven PTFE packings for the throat, and five PTFE packings for the piston that are ideal for chemical resistance and higher temperatures. Not ideal for abrasive applications. These kits are for models L__ __ C3, L__ __ C4, and some 5.9 in. bolt pattern models. Kits also include items 9, 12, 16, 19, 22, 25, 27, 32, and 59. See parts list for your lower model.

FIG. 6: Seals Repair Kits

Repair Kits - Graco Formulated UHMWPE/PTFE

Repair kits contain a set of four UHMWPE and three PTFE packings for the throat, and three UHMWPE and two PTFE packings for the piston that are for chemical resistance and durability in applications below 140 °F (60 °C). UHMWPE and PTFE packing sets are standard in XP Proportioners and are used with L___ C0, L___ C7, and L___ C9 models and some 5.9 in. bolt pattern models. Kits also include items 9, 12, 16, 19, 22, 25, 27, 29, 32, 43, and 59. See parts list for your lower model.

NOTE: All L___ C0 XP lowers built prior to April 2012 came with Tuff-Stack packing sets.

FIG. 7: Repair Kits

Kits

Inlet Ball Spring Kits

Use to improve change over rates in longer ball travel configurations. Order kit that corresponds with your lower model. See manual 406527.

NOTE: All XP Xtreme pumps include inlet springs.

Kit	Lower Models
245190	145cc, 180cc sizes
245191	220cc, 250cc, 290cc sizes

Fluid Drain Valve Repair Kit 245145

NOTE: Not for use with XP lowers.

Ref.	Description	Qty.
1	BALL, carbide	1
2	RING, retaining	1
3	O-RING, PTFE	2
4	SEAT, valve	1
5	GASKET	1

Replacement Strainers (Ref. 23)

For models with built-in filters, Series A and B pumps used 3 in. (76.2 mm) strainers 236495 in pump sizes 36-115cc. All Xtreme pumps now use 5.65 in. (143.5 mm) strainers listed below. See page 31 for conversion kit

Lower Size	2 Pack			25 Pack		
	30 mesh	60 mesh	100 mesh	30 mesh	60 mesh	100 mesh
All	224458	224459	224468	238436	238438	238440

NOTE: Standard Xtreme filter pumps come with 60 mesh XP Xtreme filter pumps comes with 30 mesh.

Ceramic Balls

Xtreme Lower	Ceramic Piston Ball	Ceramic Inlet Ball
145	111453	119264
180	111453	119264
220	118602	131271
290	117321	131271

Filter Cap Repair Kit, 24F975

Use to improve sealing of Series A filters. See manual 406882 for more information.

Ref.	Description	Qty.
20	CAP, filter, top; all pumps	1
21	SPRING	1
22	O-RING; white, thin	1
23a	STRAINER, 30 mesh, 5.65 in. (143.5 mm)	1
23b	STRAINER, 60 mesh, 5.65 in. (143.5 mm)	1
24	SUPPORT, filter	1
25	O-RING; white, medium	1
26	CAP, filter	1
59	O-RING, PTFE; white, thick	1

Series Change

The original filter cap seals were changed in 2010 for improved sealing. The o-rings are not interchangeable between different series filter caps.

The pump series for all Xtreme and XP lowers are identified by the circular grooves on the top filter cap (20).

Series A

Series B

Series C

Benefits of the new filter cap repair kit include:

- Compatible with all pump sizes
- Improves sealing
- Ensures filters are installed correctly

Series	Change Description
B	Uses thick, medium, and thin cross-section o-rings.
	Filter caps changed to accept new o-rings
C	Uses 5.65 in. (143.5 mm) strainers and supports all sizes.

★ *Maximum operating temperature of 25A710 is 390° F (200° C).*

* *Due to installed over pressure rupture discs.*

Graco Standard Warranty

Graco warrants all equipment referenced in this document which is manufactured by Graco and bearing its name to be free from defects in material and workmanship on the date of sale to the original purchaser for use. With the exception of any special, extended, or limited warranty published by Graco, Graco will, for a period of twelve months from the date of sale, repair or replace any part of the equipment determined by Graco to be defective. This warranty applies only when the equipment is installed, operated and maintained in accordance with Graco's written recommendations.

This warranty does not cover, and Graco shall not be liable for general wear and tear, or any malfunction, damage or wear caused by faulty installation, misapplication, abrasion, corrosion, inadequate or improper maintenance, negligence, accident, tampering, or substitution of non-Graco component parts. Nor shall Graco be liable for malfunction, damage or wear caused by the incompatibility of Graco equipment with structures, accessories, equipment or materials not supplied by Graco, or the improper design, manufacture, installation, operation or maintenance of structures, accessories, equipment or materials not supplied by Graco.

This warranty is conditioned upon the prepaid return of the equipment claimed to be defective to an authorized Graco distributor for verification of the claimed defect. If the claimed defect is verified, Graco will repair or replace free of charge any defective parts. The equipment will be returned to the original purchaser transportation prepaid. If inspection of the equipment does not disclose any defect in material or workmanship, repairs will be made at a reasonable charge, which charges may include the costs of parts, labor, and transportation.

THIS WARRANTY IS EXCLUSIVE, AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

Graco's sole obligation and buyer's sole remedy for any breach of warranty shall be as set forth above. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available. Any action for breach of warranty must be brought within two (2) years of the date of sale.

GRACO MAKES NO WARRANTY, AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, IN CONNECTION WITH ACCESSORIES, EQUIPMENT, MATERIALS OR COMPONENTS SOLD BUT NOT MANUFACTURED BY GRACO. These items sold, but not manufactured by Graco (such as electric motors, switches, hose, etc.), are subject to the warranty, if any, of their manufacturer. Graco will provide purchaser with reasonable assistance in making any claim for breach of these warranties.

In no event will Graco be liable for indirect, incidental, special or consequential damages resulting from Graco supplying equipment hereunder, or the furnishing, performance, or use of any products or other goods sold hereto, whether due to a breach of contract, breach of warranty, the negligence of Graco, or otherwise.

FOR GRACO CANADA CUSTOMERS

The Parties acknowledge that they have required that the present document, as well as all documents, notices and legal proceedings entered into, given or instituted pursuant hereto or relating directly or indirectly hereto, be drawn up in English. Les parties reconnaissent avoir convenu que la rédaction du présente document sera en Anglais, ainsi que tous documents, avis et procédures judiciaires exécutés, donnés ou intentés, à la suite de ou en rapport, directement ou indirectement, avec les procédures concernées.
