Function and configuration

Hydro-electric pressure switches type HED 8 are piston type pressure switches. They basically consist of the housing (1), cartridge with spool (2), compression spring (3), adjustment element (4) and micro-switch (5). If the pressure to be monitored is below the set value then the micro-switch (5) is actuated. The pressure fluid is applied to the piston (2) via orifice (7). The piston (2) supports itself on the spring seat (6) and acts against the infinitely adjustable force of the compression spring (3). The spring seat (6) transfers the movement of the piston (2) to the micro-switch (5). The micro-switch (5) is released when fluid setting pressure is reached.

The electrical circuit is either switched on or off according to the circuit design. The mechanical stop of the spring seat (6) protects the micro-switch (5), in the case of sudden pressure loss, from mechanical destruction and prevents the compression spring (3) from damaging if an over-pressure occurs.

Note:

- To increase the service life, the pressure relay should:
 - switch should be mounted vibration- proof
 - protected from hydraulic pressure shocks.

 tightening torque $M_A=8.9Nm$

Installation guideline

(Dimensions in mm)

· For applying the pressure switch HED40H...in stacking assemblies size 6

- 1 Pressure switch HED 8 OH... for use in stacking assemblies (can be rotated $4 \times 90^\circ$ for mounting). The mounting possibilities of the pressure switch depends on the design of the adjacent stacking plates
- 2 Sandwich plate type HSZ 06 for mounting the pressure switch as a stacking element.
- 3 Stacking elements.
- 4 Space required to remove the plug-in.

· For applying the pressure switch HED40H...in stacking assemblies size 10

- 1 Pressure switch HED 8 OH... for use in stacking assemblies (can be rotated $4 \times 90^\circ$ for mounting). The mounting possibilities of the pressure switch depends on the design of the adjacent stacking plates
- 2 Sandwich plate type HSZ 10 for mounting the pressure switch as a stacking element.
- 3 Stacking elements.
- 4 Space required to remove the plug-in.

For the pressure switch type HED 8...as a sandwich (350bar) (Dimensions in mm)

- 1 O-ring 9.25×1.78
- 2 Through holes for valve fixing
- 3 Mounting surface for pressure switch
- 4 Plate height 40.5 mm or 120 mm, optional.

Sandwich plates must be ordered separately.
