## **Hydraulic Pullers**

## DESCRIPTION

- Ideal for pulling a wide variety of parts, including bearings, bushings, wheels, gears and pulleys.
- The self-contained hydraulic pump saves space. A separate hose and pump are not needed to operate.
- Includes a 2 and 3 jaw puller, cross head puller, bearing attachment and all associated hardware.
- Safety release valve to prevent overloading.
- Five position adjustable handle allows for better positioning in tight areas.
- Easy to carry blow molded case for component storage.
